- Flat ground – no hill
- Texture of ground – hard (concrete or cobblestones) – NOT GRASS or SAND
- Min space for performance 4x4 m + room for audience
- Audience has to be same level with me
- Backstage area with mirror, bathroom and power plugs.
- Height min 3 m
- In case of rain I need my soundsystem to have a covered space, I can perform as long as audience is there. With heavy rain, I can perform a special rain show, where audience can be far away. Its an atmosphere show, not circle show. Best option is to take the show to a dedicated indoor pitch.
